Filing Date: : 09/15/03  
Applicant : Neal T. Saiki  
Application Title : Bicycle Rear Suspension System

Examiner : Tony Winner  
Art Unit : 3611

Mailed April 25, 2006  
Scotts Valley, CA

**Amendment A**

Commissioner of Patents and Trademarks  
P.O. Box 1450  
Alexandria, VA 22313-1450

Sir:

In response to the Office Letter mailed 02/3/06 and the subsequent Notice of Non-compliant Amendment filed on 4/10/06, kindly amend the above application as follows.

**Claims:**

Cancel the claims of record (1 to 10) and substitute new claims 11 to 20 as follows:

Claims: I claim:

11) (New) In a bicycle rear wheel suspension comprising:

- a) a main frame,
- b) a shock absorbing means,
- c) a swingarm that moves relative to the main frame,
- d) a bicycle rear wheel attached to said swingarm,
- e) a crank assembly attached to said swingarm,
- f) and a linkage means for connecting said swingarm to said frame,
- g) said swingarm has an instant center of rotation that moves as the swingarm moves from the uncompressed to fully compressed state, the instant center of rotation is horizontally located forward of the crank assembly center when the swingarm is uncompressed and moves significantly rearward as the suspension is compressed,
